

Can Science Measure the Culture of Health?

The health policy community has come to realize that health is about more than just the body. Now, resources are being directed toward research on the culture of health. But how effectively can empirical research evaluate factors such as spirituality, ethics, friendship, love, and happiness?

Come hear all sides of the debate as experts from the Harvard T.H. Chan School of Public Health, the Saint Louis University Center for Health Care Ethics, the RAND Corporation, and the University of Pittsburgh School of Nursing take part in a panel discussion at the University of Pittsburgh.

Monday, April 16, 2018
11:30 a.m.–1:30 p.m.
Wyndham University Center
Ballroom
100 Lytton Avenue

Panel Participants:
Tamara Dubowitz, RAND Corporation
Tyler VanderWeele, Harvard University
Jeffrey Bishop, Saint Louis University
Grant Martsof, University of Pittsburgh
