HEALTH EVALUATION FORMS

All nursing students must have an initial health evaluation upon admission to the university, plus an annual update evaluation until completion of the program. Students will not be permitted to register or participate in clinical activities until the completed health form has been submitted. Please refer to Policy 370.

New students will submit the Initial Health Appraisal Form before the start of the term. Current undergraduate students will submit the Annual Update Health Form before the due date of March 15; current graduate students will submit it before the due date of August 15. Please note the following information:

- Pick up health form from the Student Affairs and Alumni Relations Office (the form will be sent to online graduate students).
- Take health form to your healthcare provider.
- Submit the original document to the address provided on the form, but make copies for yourself and the clinical site.

*Failure to turn in your health form by the due date will result in a hold placed on your account which will prevent registration for the subsequent term.
