

ADMINISTRATIVE POLICIES AFFECTING THE SCHOOL OF NURSING

Clinical Hours for Prelicensure Courses

Date Effective	May 2000
Date Reviewed / Revised	August 2025
Program Level	Administrative

POLICY:

Faculty will schedule students for the number of clinical hours **required as determined by the number of clinical credits**. If students are absent on these days, refer to [Policy 45, Attendance](#).

PROCEDURE:

Faculty will schedule a maximum of one (1) clinical day for end-of-rotation evaluations.

Faculty will schedule a maximum of one (1) clinical day for orientation to the clinical unit unless there are circumstances that require a longer orientation period. When these circumstances exist, faculty will notify the Department Chair in writing of the total amount of time to be used for orientation and rationale for this need.

The total number of required clinical hours will be designated on the course syllabus. See below:

The number of required clinical hours is calculated as follows:

No. of clinical credits x ratio x 15 = total required hours. This number is then divided by the number of clinical weeks that will be scheduled during the term. The ratio is 1:3 for students in the Traditional Prelicensure Program and 1:4 for students in the Accelerated 2nd Degree BSN Program.

For example:

Traditional Prelicensure: the calculation for NUR 1057 - 2 clinical credits, would be:

$(2 \text{ credits} \times 3 \text{ (ratio)} \times 15 \text{ weeks}) = 90 / 14 \text{ weeks} = 6.4 \text{ hrs/day over 14 weeks}$

Accelerated 2nd Degree: the calculation for NUR 1260C - 1.5 clinical credits, would be:

$(1.5 \text{ credits} \times 4 \text{ (ratio)} \times 15 \text{ weeks}) = 90 / 14 \text{ weeks} = 6.4 \text{ hrs/day over 14 weeks}$

The number of weeks each term that are available for clinical will vary depending on the University calendar. Faculty will account for variability in term length by adjusting the number of hours assigned each day to achieve the total number of hours designated in the above table.

Simulation: Traditional clinical can be substituted by 30% of simulation per course:
