RESEARCH

My research reflects my study of patient adherence, addressing a variety of patient populations including rheumatological conditions, cardiovascular risk factors, diabetes, aids, cancer screening transplantation, and mental health. I have experience with the behavioral science aspects of clinical trial management including the Lipid Research Clinics Program, the Diabetes Control and Complications Trial and the Women's Health Initiative, as well as clinical trial DSMB membership including NHLBI Hypertension Prevention Trial; NEI Optic Neuritis Treatment Trial; and the NIDDK Diabetes Prevention Program Outcome Study; NAI: PROMIS Scientific Advisory Board.
