Predocutorial Traineeship Award by Department of Defense Breast Cancer Research Program (W81XWH-04-1-0352)

“Genetic Risk of Breast Cancer, Distress, and Immune Response”

2004-2007 (100% Effort)

\$59,972

: The major goal of this study was to examine the relationships among objective and subjective breast cancer risk, psychological distress, dispositional optimism, and immune response in healthy women at risk of breast cancer.

Dean’s Research Award for New Faculty by University of Alabama at Birmingham School of Nursing

“Breast Cancer Risk Factors and Biological Responses”

2007-2008 (no salary support)

\$10,000

: The goal of this study was to examine individual and interactive effects of breast cancer risk factors on the selected biological responses among healthy premenopausal women.

American Nurses Foundation/Council for the Advancement of Nursing Science by American Nurses Foundation Nursing Research Grant Program (2007-85)

“Breast Cancer Risk Factors and Biological Responses in Healthy Premenopausal Women”

2007-2008 (no salary support)

\$25,000

: The goal of this study was to examine individual and interactive effects of breast cancer risk factors on the selected biological responses along with the stability and predictability of those relationships by using repeated measures of two time points among healthy premenopausal women.

University of Pittsburgh’s Clinical and Translational Science Institute (CTSI) KL2

Multidisciplinary Clinical Research Scholars Program by NIH/National Center for Advancing Translational Sciences (8KL2TR000146-07)
